

MEDICAL OXYGEN

Oxair Medical Oxygen Systems are designed to supply an extremely reliable and continuous flow of Oxygen delivering a constant on-line oxygen purity and pressure.

All Oxygen PSA Systems are monitored to ensure an uninterrupted supply of medical-grade oxygen. Oxair can custom design a system to the customer's requirements as well as design a system to cater for peak demands.

Alarm systems can include, automatic switching over to secondary back up system, cylinders, or liquid back up system.
